

## ***FlagSource Means Only the Finest!***

Our flags are meant to last. We use a combination of the highest quality components and state-of-the-art manufacturing to give you the best looking and most durable flags in the industry.

Construction begins with the finest fabrics and color-matched threads available. We then carefully assemble each flag using a full 1/4" turn on all seams, a chain stitch for all horizontal seams (it makes the flag stronger), and a lock stitch for all edge hems. Fly hems are finished with four rows of lock stitching and a 102 stitch X-box reinforcement at the top and bottom of flags up to 6' x 10'.

Flags 8' x 12' and above we provide heavy duty chrome D-rings for maximum flying strength.
